

OMAR ALI

LEAD SOFTWARE ENGINEER | MOBILE & BACKEND

Cairo, Egypt | +20 109 286 2806 | omar160199@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Lead Software Engineer with 6+ years of experience building and shipping production mobile products across iOS and Android, with hands-on ownership spanning Flutter architecture, backend services, APIs, databases, CI/CD, and release operations. Strong expertise in Flutter/Dart and growing backend ownership with C#, ASP.NET Core, Entity Framework Core, and PostgreSQL. Experienced in team leadership, code review, mentoring, production troubleshooting, and end-to-end product delivery for teams in Egypt, the USA, and the UK.

CORE SKILLS

Mobile: Flutter, Dart, iOS, Android, Riverpod, BLoC, Clean Architecture, GoRouter, Dio, Responsive UI, Performance Optimization, Native Integrations

Backend & Data: C#, ASP.NET Core, Entity Framework Core, PostgreSQL, REST APIs, Authentication/Authorization, WebSockets, Firebase, SQL/NoSQL

Engineering & Delivery: Software Architecture, CI/CD, GitHub Actions, Azure DevOps, Azure Pipelines, Unit Testing, Widget Testing, Code Review, Debugging, QA, App Store, Google Play

Leadership & Product: Technical Leadership, Team Mentoring, Product Ownership, Requirements Analysis, Cross-functional Collaboration, Agile, AI-assisted Engineering

PROFESSIONAL EXPERIENCE

Fora for Digital Sports Technologies LLC - New Cairo, Egypt (Hybrid) | **Lead Software Engineer | Mobile & Backend** | 01/2025 - Present

- Lead end-to-end engineering of Fora Play, owning mobile development, backend services, infrastructure, CI/CD, production support, and iOS/Android releases.
- Architect and develop the Flutter/Dart mobile application and build backend services using ASP.NET Core, C#, Entity Framework Core, PostgreSQL, and REST APIs.
- Designed and implemented leagues, tournaments, group stages, knockout brackets, automated team formation, standings, voting, match management, and player management.
- Developed real-time social features including chat, stories, reactions, and community interactions; owned authentication, API integrations, database design, and server-side business logic.
- Use AI-assisted engineering workflows to accelerate implementation, testing, debugging, and delivery while maintaining production quality.

PalomaPOS - United States (Remote) | **Senior Flutter Developer** | 06/2024 - 04/2025

- Designed and maintained scalable Flutter application architecture with emphasis on maintainability, performance, and reliable production delivery.
- Built and integrated RESTful APIs, translating product and UI/UX requirements into polished mobile features across iOS and Android.
- Contributed to end-to-end feature ownership, debugging, optimization, release readiness, and production support in a distributed US-based team.

Double Click - England, United Kingdom (Remote) | **Senior Flutter Developer** | 11/2023 - 10/2024

- Built and maintained Azure Pipelines CI/CD workflows to support repeatable mobile delivery and engineering consistency.
- Performed code reviews, QA, unit testing, and widget testing to improve maintainability and reduce regressions in Flutter applications.
- Collaborated remotely across the software development lifecycle using Azure DevOps and structured delivery workflows.

Zed's - Cairo, Egypt (Remote) | **Flutter Team Lead** | 02/2023 - 03/2024

- Led and mentored the Flutter team across customer and driver applications, owning mobile architecture, code quality, technical direction, and delivery.
- Established scalable Flutter patterns, reviewed pull requests, resolved complex production issues, and coordinated with product, design, and backend teams.
- Managed REST API integrations, authentication flows, state management, navigation, release planning, CI/CD, and App Store/Google Play delivery.

Bydotpy - New Cairo, Egypt (Hybrid) | **Senior Flutter Developer** | 11/2022 - 12/2023

- Provided technical leadership and mentorship to Flutter developers, supporting architecture decisions and complex implementation challenges.
- Led code reviews, debugging, quality practices, and technical decision-making for cross-platform mobile applications.
- Created GitHub Actions CI/CD workflows and helped automate build and delivery practices.

Towebia - Cairo, Egypt | **Flutter Developer** | 03/2021 - 12/2022 Full-time; 11/2022 - 05/2023 Part-time

- Built and maintained production iOS and Android applications using Flutter and Dart with reusable, maintainable code.
- Integrated REST APIs, databases, third-party services, and responsive UI; performed testing, debugging, and performance optimization.

Upwork - Remote | **Freelance Flutter Developer - Top Rated** | 02/2020 - 10/2022

- Completed 25 Flutter projects with 5-star client feedback, delivering cross-platform applications, integrations, and production fixes.
- Owned client communication, requirements analysis, implementation, debugging, and delivery from initial scope through final handoff.

SELECTED PRODUCTION APPS

Fora Play - Sports community, events, leagues and tournaments | [Google Play](#) | [App Store](#) | [Website](#)

Paloma365 - Cloud/offline point-of-sale platform | [Google Play](#) | [App Store](#)

DClick - Visitor management application | [Google Play](#) | [App Store](#)

Sabika - سبيكة - Shariah-compliant gold investment platform | [Google Play](#) | [App Store](#)

Zed's - Customer ride/delivery application | [Google Play](#) | [App Store](#)

Zed's Driver - Driver application for the Zed's platform | [Google Play](#) | [App Store](#)
